

16x24 Barn

Call Toll-FREE: (866) 297-3760

With 512 square feet of usable space this barn has a huge interior. The 6'0" JCS-built double doors are large enough to fit your riding lawn mower, snowmobile, snow blower, lawn furniture, and ATVs. The building can be used as a garage since the floor system can handle a small to mid-size car or tractor. The open floor plan allows for a great workshop space or can be split up and be used as a cabin. Photos may depict client modifications.

Hand made in Vermont, from native rough sawn Hemlock and Pine lumber, the package includes all fastening hardware, metal roofing, and step-by-step plans necessary for assembly. Rugged post and beam techniques passed down through the centuries are at the foundation of this sturdy, picturesque retreat reminiscent of old New England. Have your own "Vermont cabin in the woods" in your backyard.

The kit is geared for those with beginner carpentry skills and basic carpentry tools. Technical support is provided via our toll-free support line. The cabin kit takes approximately two people forty hours to assemble. Step-by-step plans may be purchased separately as well.

- Included in the Kit:**
- All Fastening Hardware
 - Step-by-Step Plans

Specifications

Plans \$34.95

Jamaica Cottage Shop, Inc. engineered the plans for our designs to do-it-yourself homeowners. The detailed plans include foundation options, a shopping list, and a color coded cut list. The trigonometry of the roof triangles has all been simplified with tracing the cut out roof templates. The plans are set for full dimensional lumber and provide a clear step-by-step path.

Pre-Cut Kit

The rough sawn native Vermont lumber package has all the pieces cut and ready for assembly. It includes a cut and notched hemlock post and beam frame and pre cut pine siding. The fasteners, hardware, windows, and doors are included as well as the step by step plans. The kit is geared to a do-it-yourself homeowner with beginner to basic knowledge of carpentry.
