

8x10 Woodbin

Call Toll-Free: (866) 297-3760

Start the wood-burning season off right! Old timers here in Vermont say "get your wood stacked by Labor Day". The best way to cure firewood is to keep it dry and allow the air to pass through it. This large firewood storage shed does just that, it is attractive and practical cord wood storage.

A cord of firewood measures 4x4x8 or 128 cubic feet. This post and beam firewood shed has 80 feet of usable space. It is designed to hold four cords of firewood. The salt box roof will shed the majority of the snow off the back and out of the way.

For the serious wood burner, this kit is hand made in Vermont, from native rough sawn hemlock and pine lumber and ready to be stacked full. Rugged post and beam techniques passed down through the centuries are being applied to create a sturdy dry wood storage shed. It is built the same way they have been for centuries with native Vermont Lumber.

- Included in the kit:**
- All Fastening Hardware
 - Step-by-Step Plans

Specifications:

Square Footage: 80 sq/ft

Overall Dimensions: 10'6" H x 11'3" W x 9'10" D

Plans

Jamaica Cottage Shop, Inc. engineered the plans for our designs to do-it-yourself homeowners. The detailed plans include foundation options, a shopping list, and a color coded cut list. The trigonometry of the roof triangles has all been simplified with tracing the cut out roof templates. The plans are set for full dimensional lumber and provide a clear step-by-step path.

Complete Kit

The rough sawn native Vermont lumber package has all the pieces cut and ready for assembly. It includes a cut and notched hemlock post and beam frame and pre cut pine siding. The fasteners, hardware, windows, and doors are included as well as the step by step plans. The kit is geared to a do-it-yourself homeowner with beginner knowledge of carpentry.
