

# 8x16 Basic Run-In Shed **Call Toll-Free: (866) 297-3760**

The 8x16 Run In Shed offers added protection to pastured horses from wind, rain, snow, and summer sun. Picture this attractive run in shed out in your green rolling pasture. The sturdy horse barn is designed for all of your livestock needs and years of heavy use.

Hand made in Vermont, from true 4x4 native rough sawn hemlock and pine lumber, the package includes all fastening hardware, metal roofing and step-by-step plans. Wall heights of almost seven feet give even the largest animals, plenty of room.

The Basic Run In is designed with the same structural integrity as our Standard version, but scaled down to meet sensitive budgets. This building is not designed to be moved.

Locate the shed on a site with good drainage so the horses do not stand in muck and dirty water. Avoid placing the shed in a low spot or at the bottom of a hill where water can accumulate. Place the shed so the open side is opposite the direction from prevailing winds, to provide shelter against cold arctic winds. Situate the shed out in the open, not under large trees that could be toppled by winds or ice.

- Included in the Kit:**
- All Fastening Hardware
  - Step-by-Step Plans

### Specifications:

**Foundation Recommendation:** 3"-4" crushed gravel

**Overall dimensions:** 10'6"H x 10'8"W x 16'8"L

Shown with optional Floor System

#### DIY Plans

Jamaica Cottage Shop, Inc. engineered the plans for our designs to do-it-yourself homeowners. The detailed plans include foundation options, a shopping list, and a color coded cut list. The trigonometry of the roof triangles has all been simplified with tracing the cut out roof templates. The plans are set for full dimensional lumber and provide a clear step-by-step path.

#### Complete Kit

The rough sawn native Vermont lumber package has all the pieces cut and ready for assembly. It includes a cut and notched hemlock post and beam frame and pre cut pine siding. The fasteners, hardware, windows, and doors are included as well as the step by step plans. The kit is geared to a do-it-yourself homeowner with beginner knowledge of carpentry.
