

# 10x20 Woodbin

Call Toll-Free: (866) 297-3760

Start the wood-burning season off right! Old timers here in Vermont say “get your wood stacked by Labor Day”. The best way to cure firewood is to keep it dry and allow the air to pass through it. This large wood bin design does just that, it is attractive and practical cord wood storage.

A cord of firewood measures 4x4x8 or 128 cubic feet. This post and beam firewood shed has 1100 Cubic feet of usable space. It is designed to hold eight and a half cords of wood. The salt box roof will shed the majority of the snow off the back and out of the way.

For the serious wood burner, this kit is hand made in Vermont, from native rough sawn hemlock and pine lumber and ready to be stacked full. Rugged post and beam techniques passed down through the centuries are being applied to create a sturdy dry wood storage shed. It is built the same way they have been for centuries with native Vermont Lumber.

This firewood storage shed is great for storing the firewood for your outdoor wood burning furnace or boiler.

- Included in the kit:**
- \* All Fastening Hardware
  - \* Step-by-Step Plans

### Specifications:

**Square Footage:** 200 sq/ft

**Overall dimensions:** 21'2" W x 11'10" L x 10'6" H

**Kit Weight:** 6000 lbs

**Assembly Time:** Two People, 26 hours

*Pictures may reflect client upgrades and modifications that do not come standard. Be sure to read the standard written specs below and check out the floor plan on the right for the standard option. Cottage Associates can be reached via phone or email if you have any questions.*

### Plans

Jamaica Cottage Shop, Inc. designed these plans for do-it-yourself homeowners. The detailed plans include foundation options, a shopping list, and a color coded cut list. The trigonometry of the roof triangles has all been simplified with tracing the cut-out roof templates. The plans are set for full dimensional lumber and provide a clear step-by-step path.

### Complete Kit

The rough sawn native Vermont lumber package has all the pieces cut and ready for assembly. The fasteners, hardware, windows, and doors are included as well as the step by step plans. The kit is geared to a do-it-yourself homeowner with a basic knowledge of carpentry.
